

The key Science knowledge that I will know by the end of this unit will be:

I will be able to identify things that are living, things that are dead and things

I will be able to describe a micro-habitat.

I will explore food chains in a habitat.

I will know that living things need to live in suitable habitats.

I will show that I can work like a Scientist by:

I can classify things that are living, things that are dead and things that have never been alive.

I can explore and observe microhabitats in the local area.

Science - Year 2 Habitats

What have I learnt before and when:		What I will learn:
Reception Life cycles	Year 1 Mini beasts	Year 2 Habitats

Enquiry questions

For the Topic

Can you identify which animal lives in which habitat?

Can you identify a range of food chains?

Vocabulary	Definition
Habitat	An animal's home.
Micro—habitat	A small habitat within a larger habitat.
Food chain	A diagram which shows how each living thing gets food.
Predator	An animal that eats other animals.
Prey	An animal that is hunted by other animals.
