

The key Geography knowledge that I will know by the end of this unit will be:

- There are different kinds of farms - arable, dairy and livestock.
- UK farms often grow crops such as wheat, barley and vegetables.
- That a farm is part of land that is used for raising animals and growing crops.
- Farms are home to a lot of animals such as cows, goats, chickens, sheep and pigs.
- There is a variety of machines on a farm including tractors, combine harvesters and ploughs.

I will show that I can work like a Geographer by:

- Using a compass point to navigate around a map and identify features.
- To use vocabulary to refer to key physical/human features.
- To use aerial photographs.

Geography - Year 2 At the Farm

What have I learnt before and when:		What I will learn:
Reception The World	Year 1 Where do I live ?	Year 2 At the Farm

Vocabulary	Definition
farm	An area of land used for growing crops or raising animals.
countryside	Land which is away from towns and cities.
town	A place with many streets and buildings.
barn	A building on a farm where crops and animals are kept.
farmhouse	The main building on a farm where the farmer lives.
